1. This Municipal Bidding Document (MBD) must form part of all bids³ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).⁴ Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

PART B – SPECIFICATIONS AND PRICING SCHEDULE

14. SPECIFICATIONS

1. Background to the project

In Hermanus, in the Western Cape, the Onrus River forms part of one of the five most important Quaternary Catchments in the Overberg. The removal of Invasive Alien plants not only secures the biodiversity conservation of the area but also lowers the fire risk within the area and the surrounding properties. It also ensures the restoration of the Onrus River which will improve the quality and quantity of the water and increase the proliferation of indigenous riverine vegetation establishment to ensure the stabilisation of the river banks.

The project will be funded by the Working for Water Programme to clear on private property within the project boundaries and with Municipal funds of the Environmental Management Section budget for Municipal farms and properties.

2. Specialised field of work

The removal of invasive alien vegetation from the environmentally sensitive riparian zone is specialized work that requires competent human resources that are adequately skilled in working with heavy and dangerous machinery in aquatic and undulating conditions. The safety of all staff is of paramount importance in the implementation of this project. The environmentally sensitive riparian zone requires that the invasive alien plants are removed without damage to the natural environment which could cause further erosion and loss of the limited but important indigenous vegetation, therefore the appropriate type of equipment is an essential requirement of this project. Due to the sensitive biodiversity within the riparian zone of the Onrus River, the use of any equipment which has the potential to cause extensive damage to the river banks and indigenous flora may not be used.

The removal of invasive alien vegetation surrounding private property within the Berghof area will require a specialised work methodology to ensure that the risk of fire during the harvesting process is limited and that biomass is reduced. The specialised skill of work will also entail the contractor to have extensive experience with fire management and control measures.

3. General requirements

The works described hereunder are required in the Berghof residential area and riparian zone of the Onrus River in Hermanus, Western Cape. The project area is subject to very wet conditions, steep slopes and access to the terrain is in most places challenging. This project will be implemented on both private and municipal property and due consideration must be granted for landowner negotiation and coordination of clearing operations, by the successful contractor. The contractor must put the necessary precautions in place to work under these conditions.

4. Scope of Work

This project consists of the following elements:

- 4.1. This tender consists of 4 items, with each item representing a specific area as shown on the attached general map of the area to be cleared, **Annexure A**. The Municipality will adjudicate each item separately and reserves the right to then make a separate award for each item. This does not prevent the Municipality from awarding more than one item to a bidder depending on whether the Municipality is satisfied that the bidder will be able to complete more than one item within the prescribed timeframes of this tender.

- 4.2. **Area 1 (Annexure B)** is for the clearing of the invasive alien plants in Habonim in the area south east of the R43 bridge and eastern bank of the Onrus River. This section of the river has good natural rehabilitation of riparian vegetation in place, with 70% of the area being covered by indigenous vegetation. 15 – 25% of the site is covered in debris, with a 1- 5% infestation of alien vegetation, mainly myrtle.

The contractor needs to ensure that proper fire belts are in place to burn the biomass on site and a site plan for the fire belts need to be included.

This area presents a fire hazard to the nearby school and residences due to the amount of debris which has collected on the site. With the natural rehabilitation process already in place, a phased rehabilitation plan will later be implemented in order to complement the natural processes currently developing on this site.

The biomass on this site must be reduced by manually consolidating the debris into heaps no larger than three (3) cubic meters and stacked in designated areas. The material is dry enough to burn and the biomass can be significantly reduced by means of an appropriate fire management plan which is low risk and can be implemented in winter and which will have little or no impact on the public. The size and quantity of the debris does not warrant the implementation of a mechanical operation as the risk of damaging the already rehabilitated areas will be too high.

- 4.3. **Area 2 (Annexure C)** is for the clearing of the invasive alien plants and implementation of a fire management plan in Habonim in the riparian zone south of the R43 bridge. The site has a 30% infestation of alien vegetation, of which 10% are adult Eucalyptus trees. The remaining 70% of the vegetation is indigenous. The debris, as well as the standing alien vegetation presents a risk to the structural integrity of the bridge as well as a significant flood risk to the surrounding area.

The remedial actions on this site require the total removal of all alien species. This must be done through a combination of both manual and mechanical removal techniques. The adult Eucalyptus trees as well as the debris must be mechanically moved to a designated area outside of the acceptable flood-line which will be identified to the bidder prior to commencement of the project at the compulsory site visit.

All material found on the eastern bank of the river can be burnt together with the material mentioned in the first zone (Area 1), and material on the western bank can be burnt in situ or removed entirely from the site.

- 4.4. **Area 3 (Annexure D)** is for the clearing of alien invasive plants and implementation of a fire management plan in Berghof. The area has a 100% infestation of invasive alien species which will lead to a loss of biodiversity, a loss of water run-off and poses a significant fire hazard to the surrounding Urban Developments and mountain catchment area.

The area must be secured by means of fire belts as the removal of the alien vegetation is going to involve the cutting, stacking and burning of felled vegetation. The stacking of the vegetation will be a mechanical operation as the trees are too big to be manipulated manually. The contractor needs to ensure that proper fire belts are in place to burn the biomass on site and a site plan for the fire belts need to be included.

- 4.5. **Area 4 (Annexure E)** is for the clearing of invasive alien plants in the Hemel-en-Aarde Valley between R43 and De Bos Dam. This area carries a 100% infestation, the majority of which is Eucalyptus. This level of infestation presents a significant threat in the form of structural damage to the bridge and flooding of the areas adjacent to and in the riparian zone. The clearing work to be undertaken in this area will be challenging as it could deliver as much as 400 tons/ha. The market potential for dealing with the biomass must be investigated and submitted as a proposal with the tender.

- 4.6. All invasive alien plants found in the designated areas are to be cleared and treated with the appropriately registered herbicide. The Overstrand Municipality will supply the necessary herbicide.
- 4.7. All trunks and branches in excess of 50cm in diameter, that can be sold, must be cross-cut into 2.4m lengths and stacked in designated areas which will be identified once the operation starts.
- 4.8. The logs must be numbered and a register of all logs is to be kept and submitted with the monthly claim. The heads of logs must be painted blue to reduce the rate of splitting and cracking where necessary.
- 4.9. The remaining plant material must be stacked in separate heaps, measuring 20m x 20m x 3m in height, in designated areas which will be shown to the successful bidder once the operation starts.
- 4.10. The bidder must make provision for the removal of all plant material in the river course which is deemed to be causing a blockage to the normal flow of the river and must stack the material 32 meters away from the bank of any river, stream or dam.
- 4.11. The successful bidder must produce the required and relevant valid certificates for all personnel involved in the operations which require such certification to comply with applicable legislation (for example COIDA, Health and Safety, UIF, machine operators).
- 4.12. Machine operators and chainsaw operators must have a valid certificate of competence in accordance with the applicable SETA or FETA.
- 4.13. The Project Manager or Site Manager/Assistant must have FETA Accredited Fire Management Training, Fire-Bos I with a minimum of 5yrs experience with block burning/stack burning.
- 4.14. The bidder needs to submit evidence of similar work performed in the past 15 years by means of a Portfolio of Evidence with contactable references.
- 4.15. The proposal for the scope of work needs to specify the work methodology and outlined cost and timeframe for each Area separately.
- 4.16. The successful bidder is responsible for his own security while machinery and equipment are stored on site.
- 4.17. The successful bidder must be in compliance with the Overstrand Community Fire Safety by-law.
