

QUOTATION SC 827/2010

SPECIFICATIONS HELICOPTER SERVICES IN THE OVERSTRAND AREA

The Overstrand Municipality would like to conduct an aerial survey of the Kleinriver Mountain area close to Hermanus. The survey will be used for planning and mapping of the area for the Working for Water programme.

- Total flying time should be between 6-10 hours. The quote must include a breakdown of the ferrying time to and from site, flying time of the helicopter on site (cost per hour), cost of the pilot and fuel (including VAT). The quote must be worked out on collective flying hours.
- Robinson 44, preferably a Raven 2 or similar craft and a pilot with previous experience of low level flying in mountainous terrain.
- The mapping and planning exercise will encompass a plant survey and therefore low and slow flying will be necessary, between 40 and 50 KIAS.
- Landing will be on private land and GPS co-ordinates will be provided for the flight plan.
- Flying to take place the first week in March 2010.
- Four separate groups will participate in the survey. They will be collected and dropped off at Stanford.
