UMLINGANISELO WAMANZI UBONISA UKUBA KUKHO INTSEBENZISWANO

IIMVULA EZINTLE ESIZIFUMENEYO AZANELANGA EKUGXOTHENI IMBALELA

Kubonakala ngathi abahlali kwakunye neendwendwe ebezise kwiHermanus eNkudlwana baye balixhasa ngezandla ezingenamikhinkqi iphulo lokonga amanzi likaMasipala wase-Overstrand ngoDisemba.

NgoDisemba, umlinganiselo wedama iDe Bos uhle ngesi-3 ekhulwini kuphela xa kuthelekiswa nokuhla nge-11 ekhulwini ngoDisemba wama-2009. Lo mahluko uphawulekayo singathi ubangelwe yimozulu entle, ukusetyenziswa kwemingxuma eyembiweyo njengemithombo eyongezelelekileyo kwakunye nefuthe lemiquathango yokonga amanzi.

Xa ebesenza ilizwi lombulelo kuye wonk' ubani obenegalelo kwezi ziphumo zihle, uSodolophu uNicolette Botha-Guthrie uthethe umthembele ngenkxaso engatshitshiyo yaye uzimisele ukuzisa isiqabu ngokukhawuleza nje isakube imeko yamanzi ibuyele esiqhelweni.

Unyaka omtsha usamkele ngomvumbi wemvula othe wanyakamisa umhlaba. NgoMvulo umhla wesi-3 kuJanuwari wama-2011 kurekhodwe imvula elinganiselwa kuma-25 mm kwii-ofisi zikamasipala eHermanus yaye le mvula ilandela engama-35.5 mm iyonke erekhodwe ngoDisemba wama-2010.

Ngelishwa ke noko ayibanga nafuthe liitheni kwidama iDe Bos ngenxa yento yokuba aliqela amadama axhomekeke kuMlambo i-Onrus lento yokuba ukususela kwimbalela, umhlaba awukafumi ngokwaneleyo.

Ngokutsho kukaMnu. uRian Rust, ogcina iingxelo ezisexesheni malunga neemvula kwii-ofisi zikamasipala, umlinganiselo wama-498 mm ngowama-2010 ungaphantsi kakhulu kumlinganiselo weemvula wama-640 mm ngonyaka, kodwa naxa kunjalo mkhulu kunama-494.5 ngowama-2000, ama-464.1 ngowe-1988 nama-365.7 ngowe-1973!

Unethemba lokuba iimvula zalo nyaka ziya kulingana ne-1005.8 mm elafunyanwa kwiminyaka engama-60 eyadlulayo ngowe-1951.

Iqela likamasipala elijongene nokongiwa kwamanzi liza kuhlalanga ngomhla wama-20 kuJanuwari ukuze lihl' amahlongwane phezulu iinguqu zakutshanje. Okwangoku, kubonakala ngathi isigaba sokuqala seraph lokonga amanzi assize kutshintshwa.

IKAMVA LIZA NEMINGENI EMIKHULU

Ingathi ikamva liza nemingeni emikhulu kuMasipala wase-Overstrand, kodwa le ntlango iqule yaligangatha iqulo lempumelelo ebesoloko ijolise kuyo kwiminyaka yayo eli-10 ikho.

Ngenxa yabo bonke ubutyebi ababo, lo masipala uye watyala ibhiliyoni yeeRandi ekuphuculeni iziseko zophuhliso kule minyaka eli-10 egqithileyo, ukanti kule minyaka mine igqithileyo

nje qha utyale ngezigidini ezimalunga nama-R740.

Le nkqubo yophuculo ibiyimfuneko emandla njengoko uphengululo lwa-kutshanje lubonise ukuba i-Overstrand isarhuq' emva ngeebhiliyoni ezi-R2,5 kwiziseko zophuhliso. Kwintlanganiselo yeQonga leeNgcebiso lika-Masipala ngoNovemba, kwenziwa isaziso sokuba umasipala uza kuzama

USODOLOPHU UWOTHULEL' UMNQWAZI AMAGOSA EZOMTHETHO

Inkqubo ekudala ikho yase-Overstrand yonyanzeliso lomthetho enobuhlobo kodwa ekwangqingqwa ngethuba leeholide izel' amaduna namathokazi. Ngokutsho koMlawuli weeNkonzo zoKhuseleko, uMnu. uNeville Micheals, eli xesha lidlulileyo liye laba lelona lingakhange libe nazikhwa-silima naxa nje ngokwamagosa onyanzeliso lomthetho ibingengomntu ebekhwelwe phezu komnye kwiidolophu kunye neelwandle zalo mmandla. Phakathi kwezinye izinto, ngabantu abamalunga nama-25 000 abaye bachitha impelaveki yonyaka omtsha kwiilwandle zethu yaye zingaphezu kwama-3000 yeelitha zotywala eziye zohluthwa (zaphinda zabuyiselwa kubanini bazo emva kotyelelo lwabo lwaselwandle). Akukho mntu uye watshona kulwandle olukuluhlw lweeFlegi eziLuhlaza. Kusuku olwandulela inyibidyal, iziqhushumbisi zokudlala bezisetyenziswa ngendlela efanelekileyo ezindleleni, ukuba sekuhlani kwamagosa omthetho kuye kwafaka isandla ekubeni kubekho ucwangco ezindleleni. Kumboniso wethu obubanjwe ngoLwesine umhla wesi-6 kuJanuwari kwiZiko loLuntu lase-Overstrand, usodolophu uNicolette Botha-Guthrie uthethe ngxatsho ke kumalungu esiGqeba seeNkonzo zoKhuseleko ngokwenza iintsuku zeholide esiphuma kuzo zibe zezisemagqabini. Uphinde wabamba ngazibini kwamanye amagosa aye aqinisekisa ngokunikezela iinkonzo ezichebelezayo kwinyanga kaDisemba ngomsebenzi wawo onzima.

ukuyilwa le nto kule minyaka ingama-25 izayo.

Kuza kugxininiswa ekuhanjiseni kweenkonzo ezisisiseko kuze kunikwe ingqwalasela kwisibonelelo sikamasipala samanzi nombane, ulawulo lwenkunkuma, izindlu, iindlela, imibhobho yamanzi ezikhukula kunye nolawulo lwezendalo.

Izakhono zabantu isoloko iyeyona nto

ayixabise kunene umasipala yaye akuyi kunikwa ingqwalasela nje kuphela kuphuhliso lwabasebenzi abangamapolisa, kodwa kuzo kwakhelwa nakwizakhono zoluntu.

Olunye lophuhliso lokuqala oluza kwenziwa kukwandiswa kwebhunga ngethuba lolonyulo oluzayo lube namalungu angama-25 - neewadi ezili-13 kunye namalungu ali-12 ambaxa.

NGUSOMLOMO OZA KUBA LILISO KWIWADI YESI-3: Ngenxa yolonyulo oluzayo loomasipala, isihlalo esishiywe singenamntu ngenxa yokubeka phantsi iintambo kukaCeba u-Allan Berry siza kuhlala singenamntu kwaye akuzi kubanjwa lonyulo lovalo-zikhewu. Ngalo lonke ixesha leli bhunga likhoyo, uSomlomo, uCeba u-Anton Coetsee, nguye oza kujongana nale wadi futhi axhuzul' imikhala kwiintlanganiselo zekomiti yewadi. Kunokuqhagamshelwana naye kwii-ofisi zikamasipala eStanford. UBerry wazibeka phantsi iintambo kwintlanganiselo yebhunga ngoNovemba. Njengomakhwekhwetha wegqwetha, lo mfo udalale indima ebalulekileyo kwizibheno ezichasene nezizigqibo zebhunga. Uza kwenjenjeya ukusonga e-United Kingdom ukuya kusebenza khona.

UMLINGANISELO WEFUTHE LEZOKHENKETHO

UMasipala wase-Overstrand ukhuphe iziphumo zoMlinganiselo zoShishino lwezoKhenketho lwakutshanjengomhla wesi-2 kuDisemba wama-2010 kwintlanganiselo ebizinyaswe ngababandakanyekayo kolu shishino lwezokhenketho abamalunga nama-90.

Olu phengululo ziinzame zokufumanisa ifuthe lezokhenketho kuqoqosho lwase-Overstrand qho ngonyaka ukuze kubonwe imikhwa kwaneengqu ezithile malunga nefuthe lezoqoqosho kukhenketho.

USodolophu uNicolette Botha-Guthrie uthe olu phengululo luza kusibeka ekukhanyeni ngakumbi luze lusinike amanani esiwafuna ngamandla ngenjongo yokucwangcisa izinto kwaye luza kusinceda sibone ukuba ukhenketho luyakhula okanye luyadodobala kusini na.

Injongo yale ntlanganiso ibikukwenza abangakumbi ababandakanyekayo kolu shishino bathabathe inxaxheba kuphengululo oluzayo.

Phakathi kwezinye izinto olu phengululo ludize uku-

ba iindawo ezininzi zokufikela abantu zifumene iindwendwe ezimbalwa kakhulu ngethuba lobusika bowama-2010 kuba iNdebe yeHlabathi yenze ukuba iindwendwe eziqhelekileyo zingafiki babe nabathandi bebhola ekhatywayo benezabo izicwangciso. Noko ke, inkoliso yamashishini inethemba lokuba ubusika bowama-2011 buza kuba neendwendwe ezingakumbi nanjengokuba ukhuphiswano lweNdebe yeHlabathi lwenze zehla izibilini kwabaninzi malunga nokhuseleko lwezokhenketho eMzantsi Afrika.

Ngokutsho kolu phengululo, eyona ndlela yokuzifaka

ka kwiimarike kumashishini akurhwebo lwezokhenketho 'lilizwi lomlomo' nanjengoko usasazo lwe-elektro-niki okanye iwebhusayithi lusiya lubaluleka kule nkalo. Ii-ofisi zezokhenketho ziye zachongwa njengeendlela eziphambili zokuzifaka kwiimarike kweendawo zokufikela kunye neevenkile zokutyela.

Ukuze ufumane inkcazelo ethe vetshe yaye ubandakanyeke kuphengululo oluzayo, qhagamshelana noMlawuli wezoPhuhliso loQoqosho lwezeKhaya, uMnu. uSolomzi Madikane, kule nombolo: 028 313 8066 okanye kule imeyili ledsec@overstrand.gov.za

ASINAKUHLALA SONKE NA?

Utyelelo olwenziwe ngumhlambi weemfene kulwandle lwasePringle Bay lwenze iindwendwe ezininzi ezize kwiiholidwe zaqonda ukuba oorhema aba bayinxalenye ebalulekileyo yendalo e-Overstrand nomtsalane omkhulu kubakhenkethi. Ngokutsho komphathi wezendalo e-Overstrand, uLiesel Bezuidenhout, sinako ukuhlalisana ngoxolo neemfene, ezigqogqa amakhaya zifuna into yokutya, ngokugcina iingcango neefestile zitshixiwe xa ungekho endlwini, ngokusebenzisa imigqomo ekhethekileyo elungiselelwe izilwanyana eziyingxaki ukulahla inkunkuma yasekhitshini, sikhuthaza ukuba ungabi namithi yeziqhamo okanye isititya semifuno kwikhaya lakho, ukuyeka ukuzinika ukutya iimfene okanye ukuzibekela ukutya phandle nokungabeki ukutya kwiitafile zangaphandle kungekho mntu ukujongileyo ngexa uxakekile usenza ezinye endlwini. Musa ukuzama ukuzidubula iimfene okanye ukuzifunza ngezinja. Sebenzisana nabo balawula iimfene uze uqhagamshelane negumbi lolawulo elisebenza iiyure ezingama-24 kule nombolo: 028 313 8111 ukuba ubona iimfene kwikhaya okanye kufuphi nekhaya lakho.

IMINYHADALA YANGOFEBRUWARI

Inzalelwane yaseMzantsi Afrika uZoe Beyers (odlala imfidyoli) sithethanje ukhenketha eli loMzantsi Afrika, yaye ngoLwesibini umhla we-15 kuFebruwari, uza kube ephalekwa nguFrancois du Toit kuhadi, baza kube becula iingoma zikaBartók, uLudwig van Beethoven, uClaude Debussy, uSergei Prokofiev kwanoPablo de Sarasate. Kanti ngoLwesihlanu umhla wama-25 nangeCawa umhla wama-27, umTaliyane uZappa Mainolfi odlala icello nohadi uza kubuyela apha eHeranus ngokwesicelo. Akukabi-phi: kuba ngentsasa yangoMgqibelo, umhla wama-26, baza kube bebambe iiklasi kunye nabafundi abanomdla! Zibekele indawo eBellini kule nombolo: 028 312 4988 yaye imbuzo ungayibhekisa kuRené du Plooy apha: 082 940 4238.

IIMEKO ZENDALO EZINGQONGE I-FYNBOS

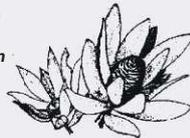

Kudederhu lokuqala lwamanqaku olungobudlelwane bezinto eziphilayo, uGqr. Neil Fairall ubonise imvelaphi yeemeko zendalo ezingqongwe utyani olufumaneka kulo mmandla wethu kuphela.

Ukuba uphos' iliso kwiindawo ekhula kuzo i-fynbos, eyona nto yokuqala etsal' amehlo ziindidi ngeendidi zayo. Inemibala-bala emininzi futhi ishinyene yaye yahlukahlukeno ngokumila ukususela emazantsi ukuya phezulu. Ukuba ziindidi ngeendidi yenye indlela ephawuleka ngayo i-fynbos, yaye oku kubangelwa yinkqubo entsonkothileyo yobudlelwane phakathi kwezendalo nemozulu, obutshintshatshintshayo ngokomlinganiselo esiwusebenzisayo. Umhlaba nawo wenza eyawo into, ingakumbi uhlobo lomhlaba, ubunzulu kwakunye nokufuma kwawo. Le nto ikwaphenjelelwa nakukuthambeka, imbonakalo kunye nemozulu.

Umlilo yinto eyindalo neqhelekileyo kwi-fynbos, iye ikhule ngamandla apho

imililo ixhaphake khona ize ingakhuli apho ithintelwa khona. Ngexesha lokuxhaphaka kwemililo, kungakhatlaseki nokuba kusemva kwexesha leemvula okanye lembalela, nokuba loo mililo iza kulandelwa lixesha leemvula okanye yimbalela, nobushushu bomlilo bunegalelo kule ntsebenziswano eyenza ukuba kubekho obu tyani nangaliphi na ixesha.

Leucadendron gandogeri

Ubushushu kunye nomsi womlilo benza iintlobo ezithile ze-fynbos zidubule kwaye ngaphandle kwazo, azinakudubula yaye naloo mbewu ibiya kubola ngokuthe ngcembe ngenxa yobudala okanye ke ityiwe zizinambuzane. Ubushushu bomlilo bubangelwa luhlobo lwento leyo etshayo, ngamany' amazwi unobangela womlilo lowo okanye icala ovela ngakulo njengoko

uvuthelwa ngumoya onamandla.

Ekuhambeni kwexesha, kusenokuvela olunye uhlobo. Ngenxa yoko, iintlobo ezincinane ezizikhulu ngaphantsi iba zezokuqala ukudubula nokukhula kodwa ziyanyamalala kamva xa elo tyholo lizisitha ngomthunzi walo ominzi. Izithole ezincinane ezingaphantsi komhlaba zikhula kuphela emva komlilo kwaye azidubuli xa elo tyholo lilidala kwaye lishinyene.

Enye into ephembelela ukuvela kwesityalo kukuba umphezulu wetyholo unazo zombini iintlobo ezibulawa ngumililo nezisasazwa ngokudubula nezinye eziphuma kwizithole ezivelisa iingcambu namagqabi kwiziqu zazo (rhizomes) ezisinda emililweni.

Xa uziqwalasela zonke ezi zinto uze ubale iindlela ezahlukahlukeneyo ezinokudityaniswa ngazo, iyacaca into

Erica fastigiata

yokuba isityalo i-fynbos iza kuhlala itshintsha lonke ixesha, ukanti iza kuhlala iseyiyo kwimimandla emikhulu. Umlinganiselo ezenzeka ngayo ezi zinto nezithuba eziphakathi kwezi ziganeke zezona zinto zibalulekileyo kule meko.

Ukuba umlilo utshisa ithafa elikhulu, uvutha ngokungafaniyo ngenxa yokwahlukahlukeneyo omlilo. Le nto ke idala ukuba kubekho izibhaxu ezithile zelo thafa ezingatshanga, eziya kuthi xa kuphinda kusibakho umlilo, zibe nezinto ezingakumbi ezitshayo, nto leyo eya kudala umlilo omkhulu nococeke ngakumbi. Kutsho ke kuphele loo yantlukwano kangangexesha elide lize nelo thafa lifane, phofu ke lisenokutshintsha nangaliphi na ixesha.

Xa ndiphinda ndibuya kwakhona, ndiza kuzama ukucacisa indlela ezi mpawu ze-fynbos ezisetyenziswa ngayo kulawulo lwamathafa nesizathu sokuba ukulawula iindawo ezincinane kunzima kangaka.
