**10. MBD 9 – CERTIFICATE OF INDEPENDENT BID DETERMINATION**

1. This Municipal Bidding Document (MBD) must form part of all bids invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>4</sup> Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

**CERTIFICATE OF INDEPENDENT BID DETERMINATION:**

In response to the invitation for the bid made by:

  - (a) has been requested to submit a bid in response to this bid invitation;

<sup>4</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

- (b) could potentially submit a bid in response to this bid invitation, based on their qualifications, abilities or experience; and
  - (c) provides the same goods and services as the bidder and/or is in the same line of business as the bidder
6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium<sup>5</sup> will not be construed as collusive bidding.
  7. In particular, without limiting the generality of paragraphs 6 above, there has been no consultation, communication, agreement or arrangement with any competitor regarding:
    - f) prices;
    - g) geographical area where product or service will be rendered (market allocation)
    - h) methods, factors or formulas used to calculate prices;
    - i) the intention or decision to submit or not to submit, a bid;

  9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.
  10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No. 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No. 12 of 2004 or any other applicable legislation.

**SPECIFIC REQUIREMENTS AND EXPECTED OUTCOMES****1. Scope**

The Municipality of Overstrand wishes to invite Service Providers to provide proposals of various types of **Energy Efficient Installation Projects**. These proposals are invited in four categories:

- a. Replacement and/or Supply and Installation of Energy Efficient Equipment within the Municipal Buildings of Overstrand Municipality.
- b. Replacement and/or Supply and Installation of Energy Efficient Equipment within Municipal Networks and Installations.
- c. Assistance, managing and/or giving effect to the Replacement and/or Supply and Installation of Residential type Energy Efficient Equipment.
- d. Supply, delivery, installation and commission of alternate forms of environment friendly Electricity Generation

**2. Definitions and Abbreviations**

CFL:	Compact Fluorescent Lamp
CIDB:	Construction Industry Development Board
EIA:	Environmental Impact Assessment
Fossil Fuelled:	Fuel such as coal which causes unacceptable pollution and comes from an irreplaceable source
Lamp:	Unit supplying light that is fitted into a light fitting
LED:	Light Emitting Diode type lamp
Light Fitting:	Unit to be fitted with a lamp and suitable to supply the specific lamp with electricity
Lm:	Lumen – Unit of light intensity
NRS:	National Rationalized Standard used for common standards between Eskom and Municipal Electricity Departments
PV:	Photo Voltaic – Process used to generate electricity from sun energy

**3. Background**

As the Electricity Network and Generation Capacity of South Africa are currently under severe stress due to insufficient supply and capacity, it is proposed that various projects be launched to produce and utilise more efficient energy and utilising efficient devices and installations. Another driving force is the intention to move away from fossil fuelled electricity generation to renewable fuelled generation. It is the target of the Municipality to reduce the consumption of electricity generated from fossil fuel by 10% by 2020.

SIGNATURE		NAME (PRINT)	
CAPACITY		DATE	
NAME OF FIRM			

It is the intention of this document to solicit proposals on how the Municipality of Overstrand, as well as the public of the Overstrand Municipal area, can reduce its electricity consumption from the current Eskom supplied networks by the installation of these devices. It should also be possible to reduce the dependency on fossil fuelled electricity by either reducing the consumption of electricity or by switching to another form of energy such as solar, wind or any other form of environmentally safe energy.

**4. General Specifications**

Proposals shall include cost savings pertaining to the reduction in energy consumption as well as reduction in maintenance cost, such as a less frequent replacement of lamps and/or control gear for example. It must be positively proved that the replacement part/unit/implement is more energy and economically effective to be used than the part/unit/implement currently in use.

The requirements as stated in the Electricity Regulation Act, Act 4 Of 2006, as amended shall be adhered to, with special reference to Regulation R.773 as promulgated on 18 July 2008.

**5. Specific Proposals**

Service Providers are requested to provide proposals within the following four categories:

- a. Replacement and/or Supply and Installation of Energy Efficient Equipment within the Municipal Buildings of Overstrand Municipality.
- b. Replacement and/or Supply and Installation of Energy Efficient Equipment within Municipal Networks and Installations.
- c. Assistance, managing and/or giving effect to the Replacement and/or Supply and Installation of Residential type Energy Efficient Equipment.
- d. Supply, delivery, installation and commission of alternate forms of environment friendly electricity generation.

**5.1 Replacement and/or Supply and Installation of Energy Efficient Equipment within the Municipal Buildings of Overstrand Municipality**

The Municipality operates a number of office blocks and other relevant municipal owned or leased buildings, which traditionally use the less energy efficient type of lighting, hot water cylinders, air conditioners and other energy consuming office tools. Proposals are therefore invited for the replacement and/or supply of relevant equipment with less energy consuming equivalents. These proposals may include, but are not limited to, the following:

- a. Replacement of all incandescent lamps with Compact Fluorescent Lamps (CFLs) or Light Emitting Diode (LED) type lamps.
- b. Replacement of all old type fluorescent tubes with energy efficient new type tubes.
- c. Replacement and/or Supply and Installation of Air Conditioner units with more energy efficient type units.

SIGNATURE		NAME (PRINT)	
CAPACITY		DATE	
NAME OF FIRM			

- d. Replacement and/or Supply and Installation of Hot Water Cylinder with Solar Type units or Heat Pump units and to sizes more efficient for office type standards. In many cases smaller storage type units would be more efficient or even the installation of instant hot water units may be more energy efficient.
- e. Replacement, Supply and/or Installation of Supply of Kettles, Urns and Catering Equipment with more efficient type units.
- f. Replacement and/or Supply and Installation of more efficient space heating units
- g. Installation of solar film on windows.
- h. Installation of ceiling insulation material.
- i. Replacement and/or Supply and Installation of any other type of energy saving device or implement.

**5.2 Replacement and/or Supply and Installation of Energy Efficient Equipment within Municipal Networks and Installations**

There are many possibilities of improving on energy efficiency within the municipal networks. A few are discussed below. The Tenderer may present proposals on those options mentioned below and/or may propose any other options that he considers viable.

**5.2.1 Streetlights**

There are a large number of streetlights within the Overstrand Municipality. The lamps used in these Street Lights are generally Mercury Vapour (MV) (mostly within residential areas), High Pressure Sodium (HPS) and Metal Halide (MH) type lamps (mostly within commercial areas). The Municipality is awaiting proposals to have these lamps, control gear and/or light fittings replaced with more efficient type lamps and/or control gear and/or light fittings and supporting equipments. These include the use of more effective reflectors designed to waste less light.

The switching off of a portion of streetlights or the dimming of a portion or all of the streetlights, at times when traffic is at a minimum may also be considered.

**5.2.2 Civil Networks**

The municipality operates a number of the following plants and equipment:

- a. Water and waste water pumping stations and reservoirs.
- b. Sewage treatment plants.
- c. There are also a number of solid waste sorting and treatment plants.

These stations are generally fitted with energy efficient electricity motors but some inefficient motor types exist. The overall operations of plants are not necessarily done within the most energy efficient means with regard to the time-of-use electricity tariffs the municipality is operating within or operations in general. Proposals are therefore invited to replace equipment with more energy efficient type equipment where necessary and/or proposals to automatically control operations of these plants to operate in a more cost or energy effective manner such that the **Electricity Consumption Expenditure and Maintenance Cost** can be reduced.

5.2.3 Proposals are therefore awaited on:

- a. Replacement and/or Supply and Installation of Street Light Lamps and/or fittings with more cost and energy effective equivalents.
- b. Replacement and/or Supply and Installation relevant equipment within the Water Plants, Waste Water Plant, Sewage pumping and Treatment Plants and Solid Waste Plant equipment with more cost and energy effective equivalents.
- c. Replacement and/or Supply and Installation or enhancement of more cost effective control of plant operations to reduce the **Electricity Consumption Expenditure and Maintenance Cost**.
- d. Any other energy saving proposals related to Electricity Distribution, Water Treatment and Distribution, Waste Water Treatment, Solid Waste Plants or any other similar operations conducted by the Municipality of Overstrand.

**5.3 Assistance, Managing and/or Giving effect to the Replacement and/or Supply and Installation of Residential type Energy Efficient Equipment**

There are a large number of residential dwellings that use less cost and energy effective fixed equipment such as Incandescent Lamps, Inefficient Hot Water Cylinders, Air Conditioners or insulation materials.

- a. Proposals are being invited to replace existing non-energy or -cost efficient lighting with high efficiency fluorescent tubes, CFLs or LED type lighting.
- b. Proposals are being invited to replace existing non-energy or -cost hot water cylinders with solar type hot water cylinders.
- c. Proposals are being invited to replace existing non-energy or -cost efficient Air Conditioners.
- d. Proposals are being invited to install ceiling insulation.
- e. Proposals are being invited to install window film to houses.
- f. Any other proposals to fit residential or commercial installations with any other more cost and energy effective fixed devices.

**5.4 Supply, delivery, installation and commission of alternate forms of environment friendly electricity generation**

There are currently many types of alternate electricity generating devices available and in sizes that would suit just about any need. These include, but are not limited to:

- Wind Electricity Generation
- Photo Voltaic (PV) Panel Electricity Generation
- Biomass Fuelled Electricity Generation
- Methane Fuelled Electricity Generation
- Wave Electricity Generation
- Tidal Electricity Generation
- Any other similar method of electricity generation

CAPACITY		DATE	
NAME OF FIRM			

Proposals are being invited to supply, construct and install any of the above mentioned, either in singular plants or in combination of any of the above, for generation by the municipality or for smaller units to be used by the public. Due cognisance must be taken with current legislation in place governing such generation and also the most economic benefit to the economy of the provision of electricity to the consumers of Overstrand Municipality as a whole. For example the current size of circuitry and electricity consumption patterns and economies must be aligned with.

**6. Conditions of Providing Proposals**

**6.1 General Conditions of Proposals**

The following General Proposal requirements will be complied with:

- a. The relevant legal, CIDB and/or Funding Institution requirements will be adhered to and will be applied depending on the nature and costing of the project in question. Prospective bidders must be registered with the CIDB where appropriate.
- b. In all cases any prospective bidders must be registered with the Municipality as a Service Provider, regardless whether projects will be performed from any external grants or similar funding sources
- c. It is not necessary to provide proposals to all categories.
- d. More than one proposal can be submitted for each category.
- e. Projects will be grouped into similar groupings within the four major topics proposed in Section 5 above. Each group will be adjudicated separately and bidders on such similar proposals will be adjudicated in such group.

The table below gives an indication of possible groupings:

## 6.2 Providing Capital Funding for Proposals

- a. Service Providers are to submit financial funding proposals for each of the proposals made, based on the aforementioned requests. It is common knowledge that Eskom and/or the Department of Energy provide such funding support in instances where all the requirements for such energy saving measures are met. There are also other sources of funds from other governmental units as well as international supporting countries.
- b. Service Providers are therefore required to submit proposals where funding, such as the Eskom example, is available and all funding proposals will contain any bridging finance needed to conduct such energy saving projects. The Service Provider will arrange for any Bridging Finance to be provided, should this be necessary.
- c. Although the municipality is eager to implement a number of energy saving proposals and is willing to drive and support these projects, it currently has very limited funds for specifically these projects. The Municipality will therefore not necessarily supply any direct funding to these projects, but may do so if the economics of such proposals prove that it is a cost saving measure at the same time as being energy efficient.
- d. With reference to energy saving measures for households, the Municipality may not fund any projects that are based on equipment belonging to others. The Municipality will however promote, advertise and support these projects, such that the participation of residents are maximised.

## 6.3 Consideration of Proposals

- a. Tenders will be evaluated for appropriateness and functionality on the following criteria:

- d. In each case careful consideration will be given to the viability, practicality or any critical inhibiting factors of each proposal. If such proposal is clearly found to be not implementable, the Municipality reserves the right not to give such proposal any further consideration and therefore reserves the right to reject any particular group or topic of proposals.
- e. It is required that bidders must have an arrangement with possible financing from applicable funding grants and bridging finance assistance and must supply details of such an arrangement. Once an award has been made and such project needs external financing, the Tenderer must be able to secure the funding within a reasonable time. Unless otherwise agreed with the Municipality, this reasonable time to secure funding will be considered as 90 (ninety) days. If such time to secure funding has been exceeded, the Municipality may terminate the award and will not be held liable for any such termination in terms of any expenses that a bidder has incurred.
- f. The Municipality may award Tenders based on area of installation, e.g. particular tenderers earmarked for particular topical, geographical or functional areas within Overstrand Municipality.

- g. If more than five tenders in any group/topic have been received, the Municipality may consider those Tenders scoring less than 50% as non-responsive and not consider any further adjudication of such Tenders. It is the intention to invite the top three adjudicated Tenderers in each group to present and demonstrate their proposals, equipment and processes to a representative panel of the Municipality. The municipality may however consider inviting less than this number or more than this number if circumstances for such change arise.
- h. Points will be scored on final presentation and the Municipality will then award tenders based on final performance. Any point scoring requirements that may be applicable from any applicable legislation, the CIDB and/or Funding Institution rules and regulations will be considered when determining the best Tender during this phase.
- i. The Municipality reserves the right to accept more than one Tenderer per Category or Group and may also refuse to award any Tenderer in whole or in part or in any Category or Group if it so wishes.
- b. Once proposals have been adjudicated, those proposals that do not effect a straight replacement of current equipment, but need a Council, Public or any other authority's inputs, will be presented to the Municipal Council for final debate and acceptance. In some instances a public participation or legal process may be required and once these processes have been completed and results reported to the Council, awards will be made accordingly.. Strict cognisance will be taken of MFMA Section 117 to ensure that Council is not involved in the actual financial adjudication of proposals, but strictly on the adjudication of ideas, siting and public scrutiny.
